

# Learn to Code Gaming Camps

Teaching kids to code and  
sportmanship through gaming.

## Learn to Code

Kids are fascinated with technology and love learning about it. We harness this natural curiosity and show them a new world where they are no longer the consumers, but the creators of technology.

## Benefit from Gaming

We take the love of gaming and run with it.

Kids in our camps meet other kids that love to game, learn sportsmanship by embracing defeat and how to graciously win.

Of course they'll learn how to be better at games, but that's not the stuff you really care about.
